## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 1-14 rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The fiber stubs 220 and 320 which are critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). It is noted from the drawings and specifications that the fiber stubs are being clampingly retained in the vice plate 422 of the instant invention to route the fiber 226. The claims however seem to recite otherwise (the fiber being clampingly retained by the swivel).

Therefore, the claims the of the instant invention are unclear and indefinite in view of the non-enabling disclosure and has not been examined in light of the prior art.
